› Customized with logo and company names

e-black

safe shipping pack

Heavy duty long term packaging

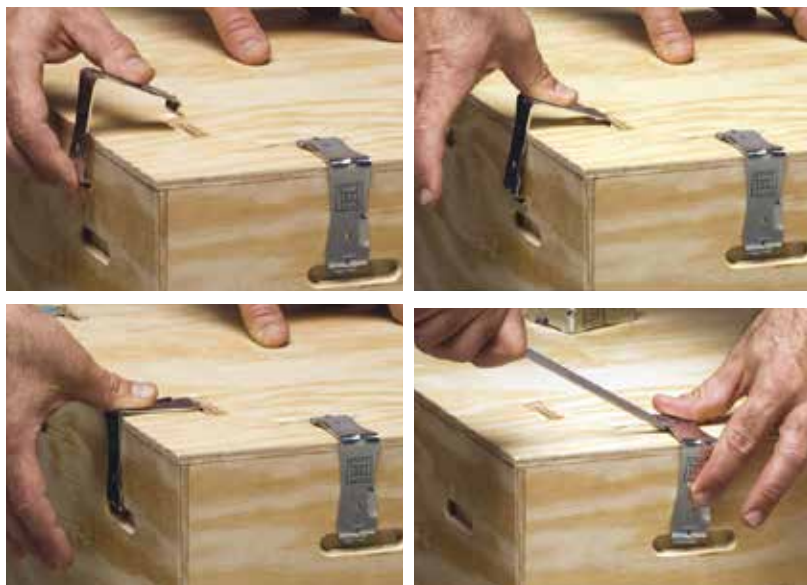

E-block is produced according requested sizes, crate walls can also be customized with logos, brands or any printing request.

E-block is a crate suitable for any type of transport, it is made of 12 mm multilayer phenolic plywood. The product is structured to withstand high levels of static and dynamic stacking. Thanks to this locking system it is not necessary to use nails or staples and the separation of materials (metal / wood) occurs naturally, thus facilitating the recovery or disposal. Thanks to the user-friendly fast system **E-block** is indicated to deliver material to fairs and exhibitions.

E-block also allows opening (also for inspection) from any side, this without any damage or alteration of any of its parts and with an immediate restoration. The locking case and clips are reusable. To fully meet the customer specifications, all **E-block** boxes are made upon request.

User friendly

Quick assembly and disassembly without special tools.

No Nails
No Rivet gun

Crate bottom
