

› Flexible construction for a modular system

› Light and handling materials

› 4 tons resistance

› 4/6 galvanized steel hinges

› Accessories available

› Internal dividers, handles and door available

› According to international phytosanitary norm ISPM-15 FAO

› Customized with logo and company names

› Standard sizes always on stock

Viko
vikontainer system

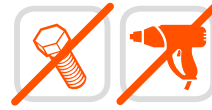

Light, competitive and safe

Viko are modular and reusable collars. The collars are made of 12 mm thick plywood with 4/6 hinges made of galvanized steel. A modular system that adapts to the various height requirements. **Viko** standard heights are 200, 300, 400, and 500 mm. Width and depth correspond to a EUR / EPAL pallet.

Viko is user friendly and resistant

Viko is made of light, resistant and durable elements giving an user friendly solution. Each collar is made of 12 mm phenolic plywood which guarantees 4 tons stacking capacity. **Viko** can be easily folded thanks to the 4 or 6 galvanized steel hinges, which firmly grip the plywood. **Viko** can be equipped with internal dividers, handles, doors and other accessories. Thanks to the steel hinges **Viko** can be folded facilitating transport and storage operations.

No Nails
No Rivet gun

Viko Standard measure (Plywood 12 mm)						
Pos	Ext. measure (mm) WxDxH			Weight (kg) 4 hinges	Weight (kg) 6 hinges	Weight (kg) lid
1	800	600	200	5	5,5	4
2	800	600	300	7	8	4
3	800	600	400	9	10,5	4
4	800	600	500	11,5	13	4
