QUICK  
ASSEMBLY

NO  
NAILS

WITHOUT  
RIVET GUNS,  
STRAPS OR STAPLES

## Reusable and sturdy

**E-block** is a crate suitable for any type of transport; the walls are made of multilayer plywood. The product is designed to withstand **a high** static and dynamic stacking **load**. Thanks to this locking system, **it is not necessary to use nails or staples** and the separation of materials (metal / wood) occurs naturally, thus facilitating their recovery or disposal. **E-block** is ideal for practical and convenient handling when transporting materials to trade fairs and exhibitions.

The **E-block** crate can be **customised** with prints, handles, locking system of tabs and slots...

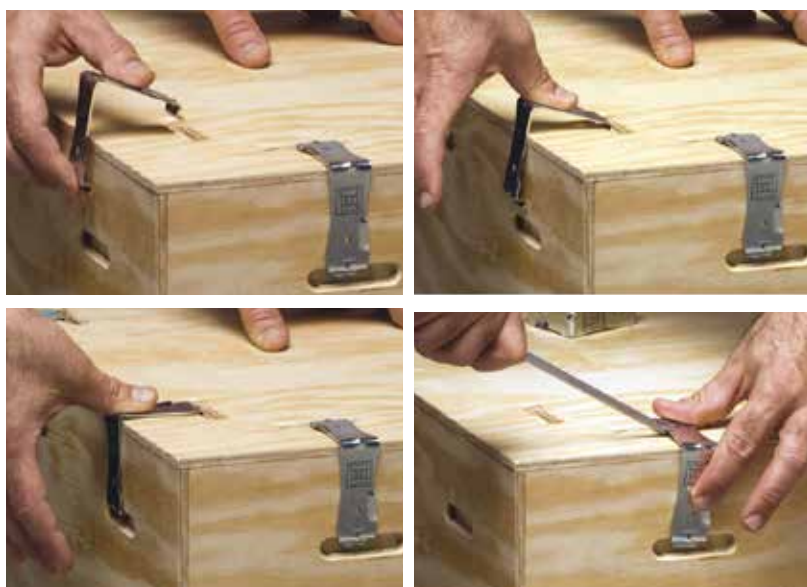

The **E-block** can also be **opened** (also for inspection) **from any side without any damage** or alteration to any of its parts, **ensuring that it can be immediately put back together**. The crate and locking system of tabs and slots are reusable. All **E-block** packaging is custom made according to the required specifications.

Dismantled crate

## Intuitive and versatile

It can quickly and easily be assembled, disassembled or opened on one or more sides, with no special equipment required.

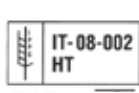

Assembly with a reusable locking system of tabs and slots
