QUICK
ASSEMBLY

SAFE AND
COMPLIANT

STURDY

Practical and sturdy packaging

The **E-force** crate consists of three parts: lid, side with reinforcement, and 2- or 4-way solid wood pallet. It is **extremely simple and quick to assemble**, thanks to a system of interlocking parts.

Improving stackability

Compared to conventional wood panel crates, **E-force** offers **greater protection against weathering and safety** even in maritime shipments as it is thermal shock resistant, **high mechanical resistance**, and **compliance with the ISPM-15 FAO phytosanitary regulations**.

E-force plywood crates are made from **quality** raw materials, which ensure that they are **resistant, flexible and durable**. **E-force** can have either 2-way or 4-way pallets.
