A practical and modular folding solution

Pallet Collar is a system of **modular collars** equipped with galvanized steel hinges. The folding strips in dried wood (20 mm thick and 200 mm high) can be **stacked and mounted on pallets**. Practical and quick to assemble, the collars allow you to **build crates of the required height** that can be closed with a **lid made of plywood** with galvanized steel corner brackets or OSB with internal strips. The 800x600 mm and 1200x800 mm models are always in stock, and the latter fit the EPAL pallet.

Multi-level, resistant and reusable Pallet Collar

The collars can be folded, which makes them easily transportable, and can be stored for re-use.

Collar accessories

The collars can be customised: internal dividers, customised shaped sheets, prints, saddles, wedges, locking system of tabs and slots, and spacers.
