**Viko**  
vikontainer system

QUICK  
ASSEMBLY

NO  
NAILS

WITHOUT  
RIVET GUNS,  
STRAPS OR STAPLES

## Light, cost-effective and safe

Viko is a system of **customisable folding collars**, which are reusable. The sides are made of plywood, assembled with **4-6 galvanised steel hinges**. It is a quick and versatile solution: the **height of the container can be adjusted** depending on the transport or storage requirements of the goods.

## Viko is resistant

Viko is made of lightweight, **easy-to-handle, resistant and durable** elements. Each individual strip is made of plywood. Viko can be easily **folded thanks to the 4 or 6 galvanised steel hinges**, which firmly grip the plywood. Viko can be customised with specific sizes for **prints, internal dividers, handles, side ridges, and other accessories**. Thanks to the steel hinges, Viko can be folded to facilitate transport and storage operations.

## Viko accessories

The Viko crate is designed for extensive customisation with: internal dividers, customised shaped sheets, prints, saddles, handles, wedges, locking system of tabs and slots, and spacers.
